## **I Introduction and methods**

<b>1 General introduction</b>	<b>3</b>
1.1 Introduction . . . . .	3
1.2 The motives for this research . . . . .	3
1.3 Risk management . . . . .	6
1.3.1 Definition of risk management . . . . .	6
1.3.2 Reasons for risk management in hospitals . . . . .	6
1.4 Risk management in literature and the risk management framework . . . . .	7
1.5 Background . . . . .	13
1.5.1 Health care in the Netherlands . . . . .	13
1.5.2 Catharina Hospital . . . . .	16
1.6 Overview . . . . .	20
1.6.1 Overview of the thesis . . . . .	20
1.6.2 The research path of the thesis . . . . .	21
<b>2 Risk and quality management</b>	<b>23</b>
2.1 Introduction . . . . .	23
2.2 Standards and audits as requirements . . . . .	23
2.3 Process deviations and risk management . . . . .	25
2.4 Care systems . . . . .	26
2.5 Risk management as a differentiation of quality management . . . . .	28
2.5.1 Introduction . . . . .	28
2.5.2 Important definitions . . . . .	30
2.5.3 Quality system at departmental level . . . . .	33

2.5.4	Central quality system at management level . . . . .	35
2.5.5	Quality-orientated organisation . . . . .	36
2.5.6	Model for quality policy in a hospital . . . . .	37
<b>3</b>	<b>Risk management: definitions and tools</b>	<b>41</b>
3.1	Introduction . . . . .	41
3.2	Definitions . . . . .	41
3.3	Models to explain the cause-effect path of incidents and complications . . . . .	47
3.3.1	Model for the development of process deviations which can lead to damage . . . . .	47
3.3.2	Model for the development of incidents and complications . . . . .	52
3.4	Framework for effective risk management . . . . .	62
3.4.1	Introduction: the risk management framework . . . . .	62
3.4.2	Process model . . . . .	65
3.4.3	Failure Mode and Effects Analysis (FMEA) . . . . .	69
3.4.4	Critical Incident Interview (CII) . . . . .	70
3.4.5	Causal Tree Analysis (CTA) . . . . .	72
3.4.6	Eindhoven Classification Model of system failure (ECM) . . . . .	73
3.4.7	Incident Reporting and Management System (IRMS) . . . . .	74
3.4.8	Complication and Incident Reporting and Management System (CIRMS) . . . . .	80
3.4.9	Legal aspects of incident and complication registration . . . . .	83
<b>II</b>	<b>Results and analysis</b>	
<b>4</b>	<b>Prospective and retrospective approach in the OR: FMEA and CIIs</b>	<b>89</b>
4.1	Introduction . . . . .	89
4.2	Process model . . . . .	90
4.2.1	Creation of the OR process model . . . . .	90
4.2.2	OR process model . . . . .	92
4.2.3	Conclusions and recommendations . . . . .	92
4.3	FMEA . . . . .	95
4.3.1	Use of the FMEA . . . . .	95
4.3.2	Results of the FMEA . . . . .	99
4.3.3	Conclusions and recommendations . . . . .	103
4.4	CIIs . . . . .	107
4.4.1	Use of the CIIs . . . . .	107

4.4.2	Results of the CIIs . . . . .	109
4.4.3	Conclusions and recommendations . . . . .	121
4.5	Comparing the FMEA results with the CII results . . . . .	125
<b>5</b>	<b>Real-time approach in the OR: IRMS</b>	<b>135</b>
5.1	Introduction . . . . .	135
5.2	Use of the IRMS . . . . .	135
5.3	Experiences with and recommendations about ECM and CTA . . . . .	149
5.4	Results of the IRMS . . . . .	150
5.5	Analysis conclusions and recommendations . . . . .	165
<b>6</b>	<b>Risk management adjustments in the OR: trial by error?</b>	<b>179</b>
6.1	Introduction . . . . .	179
6.2	Initiative towards the further development of the IRMS into a quality system . . . . .	179
6.3	New IRMS protocol . . . . .	180
6.4	Expansion of the IRMS with occupational health and safety incidents . . . . .	182
6.5	Using the new IRMS protocol . . . . .	185
6.5.1	Allocation of structural process failure to critical points . . . . .	186
6.5.2	Considerations about (possible) further research into the precise nature and dimension of problems . . . . .	189
6.5.3	Design and implementation of process and system improvements to remove structural failure . . . . .	189
6.6	Discussion . . . . .	195
6.7	Conclusions and recommendations . . . . .	196
<b>7</b>	<b>Risk management in the Haemodialysis department</b>	<b>201</b>
7.1	Introduction . . . . .	201
7.2	Process model . . . . .	205
7.2.1	Description of the Haemodialysis processes . . . . .	205
7.2.2	Results, conclusions and recommendations . . . . .	205
7.3	CIIs . . . . .	207
7.3.1	Approach . . . . .	207
7.3.2	Results, conclusions and recommendations . . . . .	208
7.4	FMEA . . . . .	225
7.4.1	Approach . . . . .	225
7.4.2	Results, conclusions and recommendations . . . . .	226
7.5	Conclusions and recommendations . . . . .	235

7.5.1	CIIIs or FMEA or both? . . . . .	235
7.5.2	Conclusions and recommendations regarding improvements . . .	238
7.5.3	Conclusions and recommendations regarding risk management .	239

### **III Conclusions and recommendations**

<b>8</b>	<b>Conclusions and recommendations</b>	<b>247</b>
8.1	Introduction . . . . .	247
8.2	Risk management methods used . . . . .	248
8.3	Risks observed . . . . .	260
8.4	Reflections about this research . . . . .	262
8.5	Near future . . . . .	268
	<b>Bibliography</b>	<b>271</b>
<b>A</b>	<b>Persons who contributed to or participated in this research</b>	<b>287</b>
<b>B</b>	<b>Contents CD-ROM</b>	<b>289</b>
<b>C</b>	<b>FMEA participants' manual</b>	<b>291</b>
<b>D</b>	<b>Classification used during the Haemodialysis FMEA</b>	<b>299</b>
<b>E</b>	<b>The Eindhoven Classification Model of system failure (ECM)</b>	<b>301</b>
<b>F</b>	<b>Problems found during the creation of the Haemodialysis process model</b>	<b>309</b>
<b>G</b>	<b>Results of the Haemodialysis CIIIs</b>	<b>313</b>
<b>H</b>	<b>Results of the Haemodialysis FMEA</b>	<b>333</b>
<b>I</b>	<b>The final IRMS reporting form (including the possibility to report Arbo incidents)</b>	<b>347</b>
<b>J</b>	<b>The number of doctors and employees who reported one or more incidents</b>	<b>351</b>
	<b>Summary</b>	<b>353</b>
	<b>Samenvatting</b>	<b>355</b>
	<b>Acknowledgements</b>	<b>357</b>
